

VIKRAM BHADORIA

Data Product Manager | Data | PowerBI | Analytics | NIT Kurukshetra

Mobile: +91-7000618440

Gurugram, India vikram.bhadoria1995@gmail.com

[LinkedIn](#)

Strategic Product Manager with 6+ years of experience specializing in BI tools, data visualization platforms, and analytics infrastructure. Proven track record of building self-service analytics modules, including NLQ (Natural Language Query) engines and complex data lineage frameworks. Expert in bridging the gap between backend query engines and frontend visualization layers to deliver intuitive, high-performance dashboarding experiences.

CORE COMPETENCIES

- Product Leadership: Roadmap Strategy, Competitive Analysis (Tableau, Power BI, ThoughtSpot), Agile Sprints.
- BI & Data Engineering: Data Modeling, Semantic Layers, SQL Query Optimization, ETL Operations, Data Lineage.
- Analytics & UX: Self-Service Dashboard Design, A/B Testing, Funnel Analysis, Event Tracking (Pendo, Clevertap).
- Technical Stack: SQL, Python, Power BI, Tableau, Looker Studio, PostgreSQL, BigQuery, GPT-4.0 Integration.

WORK EXPERIENCE

EXL Services, Gurugram

Sr. Product Consultant (Analytics and e-commerce)

08/2024-Present

- Data Lineage & Trust: Engineered and optimized data lineage frameworks to ensure transparency across complex data sets, increasing stakeholder trust and reducing data-related escalations by 40%.
- Experimentation Engine: Led cross-functional teams to execute A/B testing and hypothesis validation, driving a 15% uplift in conversion rates through iterative data-driven insights.
- Strategic Feature Rollouts: Authored comprehensive PRDs and statistical significance reports that directly influenced the roadmap for high-priority feature launches.

Netlink (Lumenore), Bhopal

Product Manager (Data analytics Platform)

03/2023-07/2024

- Lead the development of a Natural Language Query (NLQ) Module using GPT-4.0, enabling non-technical business users to generate insights via text and improving query efficiency by more than 60%.
- Conducted deep-dive feature benchmarking against industry leaders Tableau, Domo, and ThoughtSpot to identify gaps in visualization and data modeling capabilities.
- Directed the end-to-end relaunch of the analytics product, resulting in a 40% increase in job fulfillment rates and a 10-point boost in NPS.
- UX & Interaction: Validated new feature adaptability through rigorous user accessibility testing and A/B testing, ensuring a seamless self-service dashboarding experience.

Fanspace (under Fanclash), Gurugram

Associate Manager- Product Analytics

04/2022-03/2023

- Dashboard Ecosystem: Developed comprehensive executive and operational dashboards using Power BI and Tableau for a user base of 120K MAU.
- User Journey Mapping: Implemented precise event tracking and funnel analysis using Clevertap and Mixpanel, reducing user drop-off rates by 10%.
- Feature Adoption: Achieved a 20% improvement in feature adoption by aligning product constructs with validated user needs and iterative testing.

Innowatts energy, Gurugram

Data analyst

06/2021-04/2022

- Predictive Modeling: Utilized neural networks to improve power load forecasting accuracy by 15%, delivering granular data insights to stakeholders via Tableau.
- Query Optimization: Streamlined data manipulation processes using SQL and Python, reducing data processing time by 10%.

Hcl technologies, Noida

Data analyst

07/2018-08/2019

- Backend Performance: Optimized production SQL queries, resulting in a 25% reduction in execution timing and improved system throughput.

EDUCATION

- M.Tech Nano-Electronics (2019-2021)**
National Institute of Technology Kurukshetra, Kurukshetra, CGPA- 8.8/10
- B.Tech/B.E., Electronics/Telecommunication (2014-2018)**
Rustamji Institute of Technology Tekanpur Gwalior CGPA- 7.01/10

SKILLS

- BI Tools:** Power BI, Tableau, Looker Studio, Redash, Metabase.
- Databases/Backend:** SQL (PostgreSQL, BigQuery), Python, R, ETL operations.
- Product Tools:** Jira, Confluence, Pendo, Clevertap, Google Analytics.
